

OPEN/CLOSED SLIDING MESSAGE BOARD SIGNS

INSTRUCTIONS

- Remove letters from letter fonts. Best method: USE SINGLE EDGE RAZOR BLADE supplied with this kit. (Letters can also be twisted off by hand).
- Attach the OPEN/CLOSED sign panel to master frame by inserting screws through rear of sign master until they protrude through front of sign. Then, attach the four suction cups loosely to front of sign panel by inserting the protruding ends of the screws into the suction cup holes. Screw in firmly after starting all four suction cups.
- To attach sign panel to window, first be sure that window and suction cups are clean and free of dust and dirt, then just press the four suction cups firmly on to window.
- Slide reader board panel one direction to reveal OPEN sign. Slide reader board panel the other direction to reveal the CLOSED sign.
- Please note that the last line of letters on the letter fonts contain foreign currency symbols for use in the countries of Western Europe.
- To remove, lift edges of suction cups with fingernail and peel off window. **DO NOT** rip or pull sign off window as this may damage the sign face and/or the holes in the suction cups.
