

Super Sucker™

USER GUIDE

BANNER POLE INSTRUCTIONS

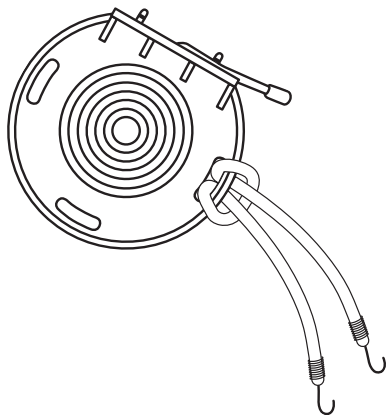

BANNERS

- Assemble **Super Sucker™** by screwing **Pole** onto threaded stud on **Base**.
- Slide hemmed and decorated banner over **Pole**.
- Screw **End Cap** onto end of **Pole**.
- Attach **Super Sucker™** to clean window with flat bracket facing up by flipping the **Lever**.
- Use multiple **Super Suckers™** for greater impact.

SIGNS

- Only use lightweight sign substrates (4mm corrugated plastic is ideal).
- Decorate sign and punch 3 holes in top of sign 1/2" - 1" from top and at least 1" from edges.
- Install 3 **Pear Clips** on sign, small end in hole.
- Slide first **O Ring** onto end of **Pole**.
- Slide sign with 3 **Pear Clips** onto **Pole**, large end over **Pole**.
- Slide second **O Ring** onto **Pole** and position so sign is centered.
- Screw **End Cap** onto end of **Pole**.
- Attach **Super Sucker™** to clean window with flat bracket facing up by flipping the **Lever**.

WINDOW BANNER HOLDER INSTRUCTIONS

INSIDE MOUNTING

- Attach 2 **Super Suckers™** to clean window, flat bracket facing up, by flipping the **Lever**.
- Make sure **Super Suckers™** are level and are spaced wider than the banner.
- Attach banner to **Super Suckers™** with bungee cords, rope, webbing, etc. Pull firmly but do not over tighten.
- For diagonal mounting use 4 **Super Suckers™**.

OUTSIDE MOUNTING

- Attach top 2 **Super Suckers™** to clean window, flat brackets facing up, by flipping the **Levers**.
- Make sure **Super Suckers™** are level and are spaced wider than the banner. For diagonal mounting raise one **Super Sucker™** to achieve desired angle.
- Attach top of banner to **Super Suckers™** with bungee cords, rope, webbing, etc. Pull firmly but do not over tighten.
- Attach bottom 2 **Super Suckers™** to clean window, flat brackets facing down, by flipping the **Levers**.
- Attach bottom of banner to **Super Suckers™** with bungee cords, rope, webbing, etc. Pull firmly but do not over tighten.

HELPFUL HINTS

- Decorate sign face or banner before attaching to **Pole** or window. Keep design simple for maximum impact.
- Bungee cords work best on banners with grommets or "D" rings and keep an even tension.
- **Super Sucker™** can be mounted to any flat, clean, smooth, non-porous surface.

- **Super Sucker™** universal sign and banner holders are designed for winds up to 25 mph. In the event of higher winds remove unit from window and bring inside.
- **Super Suckers™** should be removed at night or when the business is closed to minimize vandalism or theft. Attach sign or banner to inside of window for full time exposure.
